Dreamweaver Introduction

Course Description

Overview: Students will learn to create Websites using Macromedia Dreamweaver 3.0

Objectives: Upon successful completion of this course, students will be able to:

- Explain basic concepts about the Internet and the World Wide Web, and how to publish a site
- Navigate in the Dreamweaver work environment
- Create a basic web page by typing text and importing graphics
- Design a site from scratch, beginning with developing a site map, through final upload
- Import text into Dreamweaver pages using several methods
- Perform character and paragraph formatting on text, and define and apply HTML styles
- Add links within a site, create anchors, and specify external links
- Create and format tables to assist in page design
- Upload a site to a remote web server
